

MAXAM Tire Introduces New 24.00R35 Size to the MS453 PRO Series

3-star rated for maximum load capacity and capability

Danvers, MA – May 27th, 2026

MAXAM Tire is proud to announce the release of a new size for its MS453 PRO line, the company's premium solution for rigid dump trucks in the most demanding mining and aggregate operations. The MS453 PRO 24.00R35 is engineered for improved TMPH/TKPH capability and higher load capacity, delivering maximum productivity and tire life for applications in extreme conditions.

The MS453 PRO 24.00R35 encompasses a 3-star casing design to specifically tackle rigid haul trucks that require higher load-carrying capacity in mining and quarry conditions. Using an innovative, unique tread with an enhanced self-cleaning, two-stage void design for increased contact and grip, this tire boasts absolute stability. With multiple tread compound options to suit specific site requirements, the MS453 PRO is purpose-built to handle the toughest haul road environments.

In addition to its 3-star casing design, the MS453 PRO 24.00R35's key features and benefits include:

- Enhanced self-cleaning, two-stage void design for increased contact patch
- Unique shoulder tie bar design with reduced lug deflection, stabilizing tread shoulder
- Reduced void length on tread to maximize footprint and wear
- Reinforced sidewall, robust bead construction and enhanced steel belts to strength casing, enabling maximum puncture resistance

"At MAXAM, we know that mining & quarry operations demand more than just a tire, they demand a solution that yields higher load capacity, along with reliability that drives productivity," said Jimmy McDonnell, VP of Sales & Marketing at MAXAM Tire. "The new 3-star 24.00R35 MS453 PRO reflects our commitment to providing customers the confidence to take on tougher demands while lowering their total operating costs."

With this expansion, MAXAM reinforces its position as a trusted partner to global mining operations, delivering viable and innovative tire solutions that maximize where it matters most.
